

Boston August 6th 1840.

My dear Sir

Having been absent from the city your kind letter was not rec^d until my return to town. It would on many accounts give me pleasure to be with you - but owing to my various duties I shall not be able to visit Northampton, or be with you at the meeting of your Sunday School. - I have no doubt however but you will readily find some one who may impart life, and inspire with new energies your various Teachers. - I trust you may have much joy in this part of your labors. If you have a faithful band of Teachers I think you will derive from them peculiar satisfaction. - You have indeed a beautiful field to labor in, Nature shining in such splendor on every side. God bless you in it. Work with Nature, & He will bless you. When you visit Boston do not forget to call on

Your friend & brother
P. C. Waterston.
